

Vadim Aliautdinov

Senior GIS Specialist | ArcGIS Enterprise | Spatial Data Systems |

vadagas.90@gmail.com | Open to relocation

PERSONAL STATEMENT

Senior GIS Specialist with 13+ years of experience delivering enterprise geospatial solutions for government and commercial organisations. Extensive expertise in ArcGIS Enterprise administration, spatial data infrastructure, automation, and large-scale geospatial data processing. Managed 1,120+ layers across 80 GB geodatabases, built 4 TB+ LiDAR processing pipelines, and improved query performance by 2–3× through database and service optimisation. Supported 15–30 concurrent client environments at Esri's largest regional distributor. Seeking a Senior GIS Engineer or GIS Technical Lead role.

KEY SKILLS

- **Enterprise Administration:** Advanced management of ArcGIS Enterprise (Portal, Server, Data Store), ArcGIS Online, and multi-tier production environments.
- **Automation & Programming:** Expert in Python (ArcPy, GeoPandas, Pandas) and SQL for automating ETL pipelines and geoprocessing tasks.
- **Data Integration & ETL:** Extensive experience using FME to build scalable data integration workflows and manage complex spatial databases (PostgreSQL/PostGIS, MS SQL, Oracle).
- **Advanced Data Processing:** Specialized in processing large-scale LiDAR, DEM, and raster datasets exceeding 4 TB.
- **Web GIS & Dashboards:** Designed and deployed interactive Web GIS applications and operational dashboards for monitoring and decision support.
- **Vector & Raster Data Processing:** Proficient in topology editing, feature generalisation, spatial joins, overlay analysis, and multi-band raster processing (clipping, mosaicking, reprojection, classification) using ArcGIS Pro, QGIS, and GDAL/OGR.
- **Coordinate Systems & Projections:** Deep expertise in geodetic datums, projected and geographic coordinate systems (WGS84, ETRS89, Pulkovo 1942/SK-95, UTM, Gauss-Krüger), datum transformation, and on-the-fly reprojection in enterprise environments.
- **Cartographic Design & Map Production:** Skilled in thematic and topographic map design, symbology standardisation, map series automation (Data Driven Pages / Map Series), and print-ready layout production to national cartographic standards.

PROFESSIONAL EXPERIENCE

Senior GIS Specialist Institute of Geographic Information Technologies (IGIT) | 2023 – Present

- **Administers** a multi-tier ArcGIS Enterprise production environment (Portal · Server · Data Store) underpinning 3 national government programmes with zero unplanned downtime.
- **Automated** Python/FME automation pipelines that consolidated **1,120+ layers** and **80 GB** geodatabase, eliminating ~20 hrs/week of manual data-prep work.

- **Developed** scalable LiDAR and raster processing pipelines for datasets exceeding **4 TB**, cutting tile-generation time from days to hours and enabling near-real-time analyst access.
- **Optimized** spatial query performance 2–3× across production services via index redesign and query-plan optimisation, reducing analyst wait time on complex joins.
- **Empowers** 10+ government analysts through structured training and technical documentation, driving GIS tool adoption across 3 departments.

Senior GIS Specialist / ArcGIS Enterprise Specialist Data+ (Esri Distributor) | 2014 – 2023

- **Architected** and delivered ArcGIS Enterprise solutions for 15–30 concurrent government and commercial environments, serving as the primary technical authority for Esri’s largest regional distributor.
- **Reduced** data ingestion time by ~60% across 10+ client projects by replacing manual workflows with Python & FME ETL pipelines.
- **Maintained** 99%+ uptime across a portfolio of production ArcGIS Server environments over 9 years, retaining all key accounts through expert-level incident response.
- **Mentored** 3 junior GIS specialists into independent practitioners through structured code review and hands-on mentoring, reducing team onboarding time by half.

GIS Specialist ERM Eurasia Limited | 2013 – 2014

- **Engineered** spatial database schemas for 5+ environmental & geophysical projects, establishing data integrity standards adopted across all regional workflows.
- **Automated** data-loading validation routines that eliminated manual QA checks, improving cartographic accuracy and accelerating environmental report delivery by ~30%.

GIS Researcher State Oceanographic Institute | 2011 – 2013

- **Developed** a publicly accessible web marine atlas used by institute researchers for scientific dissemination, alongside bespoke spatial clustering and pollutant-dispersion modelling tools.

EDUCATION & QUALIFICATIONS

- **Postgraduate Research (incomplete)** – Geoecology, State Oceanographic Institute.
- **Master’s Degree** – Geography, Cartography & Geoinformatics, Lomonosov Moscow State University.

CERTIFICATIONS

- Esri Technical Certification: ArcGIS Pro Associate (2022).
- ArcGIS Enterprise: Administration & Configuration (2023).
- Spatial Analysis with ArcGIS Pro | Building Geodatabases.

SELECTED PROJECTS

- **Enterprise GIS Platforms:** Designed and deployed robust ArcGIS Enterprise environments, improving reliability for regional spatial information access.

- **Flood Modelling & Risk Analysis:** Built geoprocessing workflows for environmental risk assessments, directly supporting emergency management and Civil Defence readiness.
- **Web GIS Solutions:** Delivered dashboards and interactive maps that translate complex spatial data into usable insights for operational planning.
